The Deputy Accountant General has the honor to request that the Public Officers named below will be so good as to furnish their annual schedules of fixed establishments (not in duplicate) for 1st April 1880, in the form adopted last year, copies of which should be obtained on indent from the Stationery Depôt.

2. The schedules which should include all classes of servants in permanent employ should be despatched so as to reach this Office on or before the 1st June 1880, and with a view to ensure punctuality, the Local Treasuries will not disburse the pay of any establishments for June unless accompanied by a certificate to the effect that the annual schedule has been submitted to this Office.

"The return will shew accurately the establishment as it exists on 1st April and so will exhibit the names both of the rightful holder of the post and of the man actually doing his work during his absence on leave, on deputation or on suspension; it should be carefully checked with the service books.

If a post be vacant, the word *vacant* should be set against it in the column of *Name* of incumbent.

The rule about entry of Government orders may be freely stated thus: the general order is to be entered once only, any other order will be entered against every entry which it supports."

3. Care should be taken that the instructions contained in the Comptroller General's Circular No. 223, dated 17th December 1875, (See margin) are duly attended to in preparing the schedules.

4. Column 5 of the schedule should exhibit "date of birth" instead of "age of each incumbent."

5. Against the names of persons entertained since 1st April 1879, a note should be made pointing out the bill with which their certificates of age and health were furnished, and when persons have been transferred from other establishments, these should be specified.

Explanation of the differences between Actuals and Estimates.

Receipts.—*Land Revenue Assessed Taxes.*—The apparent short collection under these heads is owing to the demands not falling due till the later months of the year.

Forests.—Periodical sales not yet effected.

Excise.—The increase is in the Districts of Bangalore and Mysore.

Education.—A perceptible decline in schooling fees and sale of books.

Disbursements.—*Refunds.*—More under Law and Justice, Stamps and Customs.

Excise.—The increase is explained by the purchase of spirits from the Mysore and Hassan Distilleries according to revised arrangements.

Jails.—Includes a charge of Rs. 24,274 on account of the maintenance of Mysore prisoners at Port-Blair not budgeted for.

Medical.—Europe medicines budgeted for but not yet received.

Miscellaneous.—Increase due to compensation allowances and gratuities paid to Military Officers on their transfer from the Mysore Commission. Decrease under other heads owing principally to reductions in establishments.

The Treasury Officer will then forward the Money Order and two forms of receipt to the payee's address through the Anche Mutsaddi, who will be instructed to obtain the payee's signature to the two receipt forms on delivery of the Money Order, and return them to the Treasury. The Treasury Officer will send one of the receipt forms to the Post Master, Bangalore, and file the other as a means of check on the Money Order when it is presented at the District Treasury for payment.

Letters for Calcutta are now sorted in the train by the Travelling Post Office. All letters, the addresses of which do not contain full particulars of residence (such as Street, Lane, &c.) must be sorted into the bag for the Head Office, *i. e.*, the General Post Office. If the letter is deliverable through a Sub-Office, this will cause delay in its delivery, as letters with full address are sorted into direct bags for the Sub-Offices, and these bags are sent off immediately on arrival at the Head Office. The public are therefore earnestly requested to desire their correspondents to address their letters as fully as possible, otherwise delay will be inevitable.

Application from Mr. S. Lee for ground in front of his premises known as Alta Villa.

6. Read—Letter, dated 26th February 1880, from Mr. Standish Lee requesting the sale to him of certain pieces of ground situated in front of his premises known as Alta Villa at Yellegaudanpalyam.

Resolved.—That Mr. Lee be informed that of the two plots of ground now applied for by him, that marked A forms a portion of the site lately acquired by the Police authorities for the construction of Police Lines and is not now consequently available for any other purpose and further that Mr. Hewetson has promised to have the unoccupied portion of this ground enclosed and to guard against future nuisance being committed on the spot. The plot marked B is the property of the Municipality and it is resolved that the same may be granted to Mr. Lee at the usual rate at which ground is sold in that locality, *viz.*, 2 annas per square yard.

Memorial Hall.

7. Read—Letter No. 8773—G. 1758, dated 28th February 1880, from the Secretary to the Chief Commissioner of Mysore, General Department, suggesting the completion by the Municipality of the Mayo Memorial Hall, the charge being met from the funds set aside for the construction of a Municipal Office.

Resolution.—The Commissioners consider it desirable that before the present proposal can be accepted they should be informed as to whether the Local Government considering the circumstances under which the Mayo Memorial Hall was brought into existence, *viz.*, by public subscriptions, is now prepared to make over the building as the sole property of the Municipality; further the Commissioners would wish to be informed with reference to the sum contributed by the Bowring Memorial Committee whether there is any stipulation made with that Committee as to any portion of the Mayo Hall being reserved for the Literary Institute. The Commissioners would beg to point out that among the records of the Municipal Office are many valuable and important papers whose loss would not only entail great inconvenience to the Municipality but to the public at large and they consider therefore that the location of a public library in the same premises as that occupied by the Municipal Office is an arrangement very undesirable and one that cannot meet with their approval.

Widening Fruit Street.

8. Read—Compensation list for houses, &c., required to be taken up for widening Fruit Street.

Resolution.—Sanctioned, and that Rs. 324—5—1, the amount of compensation for the houses and land required to be taken up, be met from the allotment under head compensation.

No 198.

The 21st April 1880.

Pension or Gratuity.

4. Read letter No. 5916, dated 9th March 1880, from the Deputy Accountant General in Mysore, relating to the proposed gratuity to Overseer Mahomed Husen, attached to the late Sar Amin's Municipal Establishment.

Resolved.—That a recommendation be made to the Chief Commissioner for the grant of a pension of Rs. 6—10—8 to Mahomed Husen of the Sar Amin's Establishment, the proportion of which pension chargeable to Municipal Funds will amount to Rs. 5—3—2 monthly. The Commissioners consider it desirable to point out that while Municipal employés transferred from

Government service to that of the Municipality and who may have only served under Government for a very limited period are under the provisions of the Proceedings of the Chief Commissioner of Mysore and order thereon No. 4144—Ml. 5, dated 3rd April 1878, now eligible for a pension : those of their own employés who have served all their time in the Municipality are not under the present rules in force entitled to a like indulgence. The Commissioners cannot but consider that one class of their employés is thus placed in a very anomalous and inviduous position and they avail themselves of this opportunity to once more press on Government the desirability of sanction being obtained to the insertion into the Bangalore Municipal Regulations of 1871 of a clause somewhat similar to clause 8 of the Madras Act V of 1871, which clause provides for the grant of pensions and gratuities to Municipal employés. The Commissioners further consider that the provisions of the Civil Pension Code, Civil Leave Code and Acting Allowance Code might advantageously be extended to the Municipality.

Application for ground in Alsur.

5. Read application from Mr. V. Sadasiva Modaliar for a piece of ground in Alsur.

Resolved.—That the small piece of ground forming a portion of the disused road and adjoining Mr. Sadasiva Modaliar's garden at the Dhobi's Ghat be granted to him at the usual rate.

The President having read the letters from the Secretary to the Chief Commissioner No. 877—G. 1738, dated 28th February, and No. 453—G. 13, dated 16th April 1880, General Ottley observed that he had now repeatedly visited and inspected the Mayo Hall premises and he was of opinion that the building with certain alterations and additions could be made admirably suitable for Municipal Offices. As it was intended that the entire upper story should be reserved for public purposes, he considered it a *sinequanon* that the whole of the lower story should be placed at the disposal of the Municipality and that it would be necessary also that out-offices should be constructed and for which the large compound attached to the premises fortunately furnished ample space.

Mr. Lee enquired whether, in addition to the amount now required for the completion of the building, there was any outstanding balance due to the late contractor and which the Municipality might be expected or called upon to make good; he added that according to a rough computation made by him he calculated that the expenditure to be incurred in the completion of the building, the erection of out-offices and compound wall, the purchase of furniture, &c., would amount to fully Rs. 30,000, and he wished to know whether the Municipality were in a position to make good so large an outlay. The President replied that in the abstract estimate of the amount required to complete the building furnished to him no mention was made of any outstanding balance due to the late contractor, and he took it for granted therefore that no liability of this nature really existed.

Captain Curley remarked that he believed that with a due exercise of economy a considerable saving might be effected in the several items of expenditure connected with the completion of the building, and he enquired whether it was intended that the building should be made over as it now stands to be completed at the cost and under the direction of the Municipality, or whether the work necessary for its completion would be carried out by Government. The President replied that the intentions of Government on this point were not definitely expressed, but from the tenor of Mr. Cuningham's two letters he was of opinion that Government intended that the completion of the Hall should be carried out by the Municipality.

Mr. Leonard said that it would save much correspondence and tend to a speedy settlement of this question were the Commissioners to state clearly and explicitly their views in the matter and the conditions under which they were prepared to take over the building; that from the letters read to the Meeting it was evident that Government wished and were prepared to make over the Hall to the Municipality, and he would propose that Government should now be informed that the Municipality would take it over on the following distinct conditions:—That the Municipality should not be responsible for any liabilities incurred and due up to date on account of work done by the late contractor, that the building be made over as it now stands to be completed under the charge of the Municipality and that in consideration of the large expenditure that would have to be incurred in finishing and making the building suitable for Municipal offices the Chief Commissioner might be pleased to relieve the Municipality from making good the amount required to be refunded to the Bowring Institute.

The President said that, having consideration to the conditions under which the money now held in deposit by the Municipality was permitted by Government to be accumulated and bearing also in mind the fact that this Municipality was not financially independent of Government, he was of opinion that they were not in a position nor would it be considered becoming on their part to dictate to Government the terms and conditions under which they were prepared to take over the Hall as proposed by Mr. Leonard, and he considered that they should confine themselves to a simple expression of what their views and wishes were, and which expression of opinion he was quite sure would meet with every consideration at the hands of the Chief Commissioner. The President's suggestions seemed to meet the general approval of the Commissioners present and after some further discussion the following resolution was unanimously adopted:—

Resolved—That Government be informed that the Commissioners are prepared to take over the Mayo Hall on the conditions proposed by the Chief Commissioner, *viz.*, that it be made over to the Municipality to be its property solely, on the understanding that the public have a right to it for Meetings held for a proper purpose.

The Commissioners understand from the correspondence that has passed on this subject that Government intend that the Hall should be made over to the Municipality as it at present stands free of all liabilities that may be due to the former contractor or other parties, and that the Municipality will be entrusted with the carrying out of the work still remaining for the completion of the building. They beg to point out that to render the premises at all suitable for Municipal Offices, it will not only be necessary to exclude therefrom the Bowring Institute but to erect in addition a suitable range of out-offices; they trust therefore that in consideration of the heavy outlay that they will thus have to incur the Chief Commissioner may be pleased to relieve the Municipality from making good the amount of the Bowring Institute contribution.

POLICE DEPARTMENT.

To—The Deputy Commissioners of Districts, &c., Circular No. 210—6, *dated 7th June* 1880.

Referring to Section 50 of the Regular Police Rules, published in the *Mysore Gazette* of the 6th July 1878, page 454, Part II, requiring the Police to submit a report to the Magistracy after investigation of all cognizable and well-founded cases but in which the Police fail to discover the perpetrators; the Chief Commissioner directs attention to the fact that such report is not a final report, but an intermediate report for orders. It is necessary that the Police should by report inform the Magistrate of their difficulty in detection and of the steps taken, but it is incorrect to send the report in form of a charge sheet (Form A) which it is not. No form need be laid down for these intermediate reports of undetected cases.

Interpretation clause.

2. In this Act, unless there is something repugnant in the subject or context,—

"Committee."

"town-duty." "town-duty" includes any duty or tax levied under any designation by a Committee upon any thing imported.

Town-duty or toll not to be levied except in accordance with Act.

3. Except in accordance with this Act and the rules made hereunder, no town-duty or toll shall be levied in any municipality.

Prohibition of levy of town-duty—

4. No town-duty shall be levied—

in municipality the population of which is less than five thousand;

(*a*) in any municipality the population of which, as estimated by the Local Government, is less than five thousand persons; or

on article imported for Government.

(*b*) on any article imported by Government or for the use of Government.

Town-duty not to be levied on certain articles.

5. No town-duty shall be levied on any article other than articles falling under the heads specified in Schedule A hereto annexed, without the previous sanction of the Governor General in Council,

or on any article falling under any of the said heads if and so long as the Governor General in Council prohibits the levy of such duty thereon.

No town-duty shall under any circumstances be levied on any article falling under any head specified in Schedule B hereto annexed.

Government to prohibit levy of duty in certain cases.

6. The Governor General in Council or the Local Government shall prohibit the levy of town-duty on any articles in a municipality whenever it appears to him or it that such duty is being levied otherwise than in accordance with this Act, or that the levy of such duty interferes with or obstructs the freedom of trade in such articles within any place beyond the limits of such municipality, or tends to diminish the amount of such trade, or the profits of persons engaged therein.

Refund on exportation.

7. When any article on which town-duty is leviable is exported, the full amount of the duty leviable thereon on its importation shall be refunded to the person exporting such article: Provided that no such refund need be made if the quantity or value of the article exported, or the sum claimable as a refund, is less than such quantity or sum as may from time to time be fixed by the Local Government, subject to the control of the Governor General in Council.

No proof shall ordinarily be required that duty was paid on the importation of such article; but if the Magistrate of the District, or such other officer as may from time to time be specially authorized by the Local Government in this behalf, has reason to believe

that no town-duty has been paid thereon, he may order an enquiry to be made; and, if he is satisfied that no such duty has been paid, no refund shall be made.

The right to claim a refund under this section shall not be affected by reason of the article having changed owners since it was imported.

Warehouses to be provided by Committee.

8. The Committee of every municipality in which town-duties are levied shall, subject to the rules to be made by the Local Government under section thirteen, provide within the limits of such municipality warehouses in which all articles of a description chargeable with town-duty but not intended for use or consumption within the limits of the municipality may be stored without payment of duty.

Estimate of probable consumption of dutiable articles to be submitted each year by Committee.

9. The Committee of every municipality in which town-duties are levied shall, on or before the first day of February in every year, submit to the Local Government an estimate for the year commencing on the first day of April then next following, shewing—

(*a*) the population of such municipality;

(*b*) the probable consumption per head of population during such year within the limits of the municipality of every class of articles chargeable with town-duty;

(*c*) the probable total consumption during such year, within such limits, of every such class of articles.

In making such estimate, no account shall be taken of the quantity of any article used in the manufacture within the limits of the municipality of any article intended for exportation.

Every estimate submitted under this section shall be published in such manner as the Local Government may direct.

Statements to be submitted each year by Committee.

10. The Committee of every municipality in which town-duties are levied shall, on or before the first day of June in each year, submit to the Local Government a statement for the year ending on the thirty-first day of March last preceding, shewing—

(*a*) the quantity of each class of articles imported during such year, whether chargeable with town-duty or not, which may be required by the rules to be made under section thirteen to be shewn in such statement;

(*b*) the quantity of each class of articles chargeable with town-duty imported and exported during such year;

(*c*) the amount of duty levied on each class of articles during such year;

(*d*) the amount paid under section seven as refund on each class of articles during such year; and

(*e*) the quantity of each class of articles in bond at the close of such year.

Every statement submitted under this section shall be published in such manner as the Local Government may direct.

11. If it appears from any such statement that the quantity of any class of articles on which town-duty has been paid (after deducting the quantity on which the amount of a town-duty has been refunded as provided by section seven) exceeds by more than one-fourth part the quantity estimated by the Committee in accordance with the provisions of section nine as the probable total consumption during the year, it shall be presumed, with regard to such class of articles, that town-duty has been levied on it in cases when it is not actually used or consumed within the limits of the municipality, and a report, explaining the reason of such excess over such estimated quantity, shall forthwith be made by the Committee for the information of the Local Government, and a copy of such report shall forthwith be sent by the Local Government for the information of the Governor General in Council.

Presumption that duty has been levied on articles not consumed in the municipality, when return of quantity on which duty paid exceeds by one-fourth quantity estimated.

Unless the Local Government, on receipt of such report or after such further inquiry as it may think necessary, is satisfied that duty has not been so levied, or that such excess is due to some temporary fluctuation in the ordinary course of trade or some other temporary cause, it shall, by notification in the official Gazette, order that the levy of town-duty on such class of article shall cease.

Local Government to order that the levy of duty on such articles shall cease.

On the publication of an order under this section, no town-duty shall again be levied on such class of articles until after the expiration of two years from the date of such order.

On such order no duty to be levied on such articles for two years.

The Local Government shall forthwith report every such order and the reasons therefor to the Governor General in Council.

Order to be reported to the Governor General in Council.

Town duties to be collected by municipal officers.

12. All town-duties shall be collected by officers directly appointed by the Committee.

Power to Local Government to make Rules.

(*a*) limiting the articles or classes of articles liable to town-duty ;

(*b*) limiting the amount of town-duty leviable upon any article ;

(*c*) prescribing the conditions under which the warehouses referred to in section eight shall be provided and under which articles may be stored therein, and the fees which may be levied for the use of the same ; and

(*d*) prescribing the manner in which the estimate and statement referred to in sections nine and ten respectively shall be prepared.

All such rules shall be published in the local official Gazette, and shall thereupon have the force of law.

14. No toll shall be levied by any Committee unless the same is levied under some enactment for the time being in force and is levied on a road, bridge, quay, wharf or other work solely for the purpose of defraying the cost of the construction of such work, or of its maintenance, or the interest on the capital expended thereon.

Tolls not to be levied except for purpose of defraying cost of construction of work or its maintenance.

If any question arises as to whether any toll is levied solely for the purpose aforesaid, the decision of the Local Government thereon shall be final.

Statement of Objects and Reasons.

In the Financial Statement for the present year, 1879-80, it was stated as follows:—

"In connection with the subject of customs-duties, it may be mentioned here that the Government of India has, for some time past, had under consideration the necessity of imposing more complete checks on the system by which, through a large part of India, octroi-duties are levied for municipal purposes. The Government of India has emphatically condemned the imposition of local taxes on articles which have been either subjected to or relieved from imperial taxation, and has insisted that the duties actually levied shall in all cases fall solely upon articles locally consumed, and shall not be allowed to become taxes on through traffic, or to affect injuriously the general trade of the country.

"Although much has been done in this respect towards the enforcement of appropriate rates, continued attention will be given to the subject, so that there may be no danger of finding that the principles by which the Government of India is guided in regard to its commercial legislation have been set aside by local authorities, and that the efforts taken to free the trade of the country from impolitic restrictions have not thus been frustrated."

It is in fulfilment of the pledge thus publicly given, that the present measure is brought forward.

2. The income of the municipalites throughout a large portion of British India is raised chiefly in the shape of town-duties. The proportion of the municipal income thus raised amounts, in the Bombay Presidency (including the town of Bombay), to about four-sevenths of the whole; in the North-Western Provinces and Oudh, to about ten-elevenths of the whole, and in the Panjáb and Central Provinces, it is much higher; town duties constituting almost the sole resource of the municipalities of these Provinces.

In many places the people have been familiar with this form of taxation from a time anterior to our rule; but it is obvious that the very popularity of the octroi-system is apt to lead to its being abused. Local authorities are not sorry to be able to provide for local wants at the expense of other people, and to transfer to others their own proper burdens. It is found that in many towns, and among others in some of the most important entrepôts of trade in British India, the incidence of the tax has been extended so far beyond its legitimate bounds, or the collection has been so mismanaged, as either to involve a collision with imperial taxation, or, still worse, to set up what is to all intents and purposes a heavy

transit-duty. To quote the words of a Resolution issued by the Government of India in 1868, "a wide-spread system of taxation has been introduced, injurious to interests on which the burden in a great measure falls, and standing in the way of the proper development of the commerce of the country. It is to little purpose that the Imperial Government reduces or abolishes customs-duties in the interests of trade, if municipalities are permitted to levy duties on articles of commerce passing through their limits."

3. The Government of India, for some years past, has had its attention directed to these serious evils, and instructions have from time to time been issued with a view to their repression.

In 1868, the principles by which these duties should be regulated were laid down. It was stated that they should be restricted to articles actually consumed in the towns, and should not be imposed on articles of general commerce, or interfere with the natural course of transit-trade, and that they must fall entirely on the population of the town for the benefit of which they were imposed. The classes of articles on which octroi-duties might be, and might not be, imposed were enumerated. The necessity for establishing bonded-warehouses on a proper footing and giving all due facilities for refunds, so as to prevent the tax degenerating into a transit-duty, was insisted on, and attention was drawn to the importance of collecting directly through the servants of the municipality, instead of farming the duties to a contractor.

4. Similar orders have been issued from time to time by the Government of India. Its efforts have not been without effect; but a review of the working of the octroi-system in many municipalities shews that they have fallen far short of attaining the objects in view, and on a full consideration of the whole question, the Governor General in Council is satisfied that the only effectual plan will be to lay down in legislative enactment the restrictions which it is desired to impose.

It is with this object that the present Bill has been framed. Besides providing for the matters above referred to, it establishes what may be called a self-acting check on the most dangerous abuse of the octroi-system by providing in effect that, when the quantity of any commodity taxed in any town in a given year exceeds by one-fourth the estimated consumption of such commodity in such town during that year, the levy of the tax on such commodity shall, unless the excess is shewn to be of a temporary or accidental nature, be suspended for two years.

It has been long the custom in some Provinces to make such estimates with the object of providing a check, such as that which it is now desired to establish, on abuse of octroi-taxation; and the plan has been so useful for that purpose, especially in the North-Western Provinces, that it is hoped it may be found generally applicable.

5. The Bill, besides dealing with the matter of octroi in this way, provides in its fourteenth section that no toll shall be levied in a municipality, except for defraying the cost of construction of the road or other work on which it is levied, together with interest on the same and maintenance charges. This rule is one generally recognized as a matter of principle: but it has often been disregarded, and it is thought necessary to embody it in the Bill.

STATEMENT OF OBJECTS AND REASONS.

IN the Financial Statement for the present year, 1879-80, it was stated as follows:—

"In connection with the subject of customs-duties, it may be mentioned here that the Government of India has, for some time past, had under consideration the necessity of imposing more complete checks on the system by which, through a large part of India, octroi-duties are levied for municipal purposes. The Government of India has emphatically condemned the imposition of local taxes on articles which have been either subjected to or relieved from imperial taxation, and has insisted that the duties actually levied shall in all cases fall solely upon articles locally consumed, and shall not be allowed to become taxes on through traffic, or to affect injuriously the general trade of the country.

"Although much has been done in this respect towards the enforcement of appropriate rates, continued attention will be given to the subject, so that there may be no danger of finding that the principles by which the Government of India is guided in regard to its commercial legislation have been set aside by local authorities, and that the efforts taken to free the trade of the country from impolitic restrictions have not thus been frustrated."

It is in fulfilment of the pledge thus publicly given, that the present measure is brought forward.

2. The income of the municipalities throughout a large portion of British India is raised chiefly in the shape of town-duties. The proportion of the municipal income thus raised amounts, in the Bombay Presidency (including the town of Bombay), to about four-sevenths of the whole; in the North-Western Provinces and Oudh, to about ten-elevenths of the whole, and in the Panjáb and Central Provinces, it is much higher; town duties constituting almost the sole resource of the municipalities of these Provinces.

In many places the people have been familiar with this form of taxation from a time anterior to our rule; but it is obvious that the very popularity of the octroi-system is apt to lead to its being abused. Local authorities are not sorry to be able to provide for local wants at the expense of other people, and to transfer to others their own proper burdens. It is found that in many towns, and among others in some of the most important entrepôts of trade in British India, the incidence of the tax has been extended so far beyond its legitimate bounds, or the collection has been so mismanaged, as either to involve a collision with imperial taxation, or, still worse, to set up what is to all intents and purposes a heavy

transit-duty. To quote the words of a Resolution issued by the Government of India in 1868, "a wide-spread system of taxation has been introduced, injurious to interests on which the burden in a great measure falls, and standing in the way of the proper development of the commerce of the country. It is to little purpose that the Imperial Government reduces or abolishes customs-duties in the interests of trade, if municipalities are permitted to levy duties on articles of commerce passing through their limits."

3. The Government of India, for some years past, has had its attention directed to these serious evils, and instructions have from time to time been issued with a view to their repression.

In 1868, the principles by which these duties should be regulated were laid down. It was stated that they should be restricted to articles actually consumed in the towns, and should not be imposed on articles of general commerce, or interfere with the natural course of transit-trade, and that they must fall entirely on the population of the town for the benefit of which they were imposed. The classes of articles on which octroi-duties might be, and might not be, imposed were enumerated. The necessity for establishing bonded-warehouses on a proper footing and giving all due facilities for refunds, so as to prevent the tax degenerating into a transit-duty, was insisted on, and attention was drawn to the importance of collecting directly through the servants of the municipality, instead of farming the duties to a contractor.

4. Similar orders have been issued from time to time by the Government of India. Its efforts have not been without effect; but a review of the working of the octroi-system in many municipalities shews that they have fallen far short of attaining the objects in view, and on a full consideration of the whole question, the Governor General in Council is satisfied that the only effectual plan will be to lay down in legislative enactment the restrictions which it is desired to impose.

It is with this object that the present Bill has been framed. Besides providing for the matters above referred to, it establishes what may be called a self-acting check on the most dangerous abuse of the octroi-system by providing in effect that, when the quantity of any commodity taxed in any town in a given year exceeds by one-fourth the estimated consumption of such commodity in such town during that year, the levy of the tax on such commodity shall, unless the excess is shewn to be of a temporary or accidental nature, be suspended for two years.

It has been long the custom in some Provinces to make such estimates with the object of providing a check, such as that which it is now desired to establish, on abuse of octroi-taxation; and the plan has been so useful for that purpose, especially in the North-Western Provinces, that it is hoped it may be found generally applicable.

5. The Bill, besides dealing with the matter of octroi in this way, provides in its fourteenth section that no toll shall be levied in a municipality, except for defraying the cost of construction of the road or other work on which it is levied, together with interest on the same and maintenance charges. This rule is one generally recognized as a matter of principle: but it has often been disregarded, and it is thought necessary to embody it in the Bill.

or on any article falling under any of the said heads if and so long as the Governor General in Council prohibits the levy of such duty thereon.

No town-duty shall under any circumstances be levied on any article falling under any head specified in Schedule B hereto annexed.

6. The Governor General in Council or the Local Government shall prohibit the levy of town-duty on any articles in a municipality whenever it appears to him or it that such duty is being levied otherwise than in accordance with this Act, or that the levy of such duty interferes with or obstructs the freedom of trade in such articles within any place beyond the limits of such municipality, or tends to diminish the amount of such trade, or the profits of persons engaged therein.

Government to prohibit levy of duty in certain cases.

7. When any article on which town duty is leviable is exported, the full amount of the duty leviable thereon on its importation shall be refunded to the person exporting such article: Provided that no such refund need be made if the quantity or value of the article exported, or the sum claimable as a refund, is less than such quantity or sum as may from time to time be fixed by the Local Government, subject to the control of the Governor General in Council.

Refund on exportation.

No proof shall ordinarily be required that duty was paid on the importation of such article; but if the Magistrate of the District, or such other officer as may from time to time be specially authorized by the Local Government in this behalf, has reason to believe

that no town-duty has been paid thereon, he may order an enquiry to be made; and, if he is satisfied that no such duty has been paid, no refund shall be made. 523

The right to claim a refund under this section shall not be affected by reason of the article having changed owners since it was imported.

Warehouses to be provided by Committee.

8. The Committee of every municipality in which town-duties are levied shall, subject to the rules to be made by the Local Government under section thirteen, provide within the limits of such municipality warehouses in which all articles of a description chargeable with town-duty but not intended for use or consumption within the limits of the municipality may be stored without payment of duty.

Estimate of probable consumption of dutiable articles to be submitted each year by Committee.

9. The Committee of every municipality in which town-duties are levied shall, on or before the first day of February in every year, submit to the Local Government an estimate for the year commencing on the first day of April then next following, shewing—

(*a*) the population of such municipality;

(*b*) the probable consumption per head of population during such year within the limits of the municipality of every class of articles chargeable with town-duty;

(*c*) the probable total consumption during such year, within such limits, of every such class of articles.

In making such estimate, no account shall be taken of the quantity of any article used in the manufacture within the limits of the municipality of any article intended for exportation.

Every estimate submitted under this section shall be published in such manner as the Local Government may direct.

Statements to be submitted each year by Committee.

10. The Committee of every municipality in which town-duties are levied shall, on or before the first day of June in each year, submit to the Local Government a statement for the year ending on the thirty-first day of March last preceding, shewing—

(*a*) the quantity of each class of articles imported during such year, whether chargeable with town-duty or not, which may be required by the rules to be made under section thirteen to be shewn in such statement;

(*b*) the quantity of each class of articles chargeable with town-duty imported and exported during such year;

(*c*) the amount of duty levied on each class of articles during such year;

(*d*) the amount paid under section seven as refund on each class of articles during such year; and

(*e*) the quantity of each class of articles in bond at the close of such year.

Every statement submitted under this section shall be published in such manner as the Local Government may direct.

11. If it appears from any such statement that the quantity of any class of articles on which town-duty has been paid (after deducting the quantity on which the amount of a town-duty has been refunded as provided by section seven) exceeds by more than one-fourth part the quantity estimated by the Committee in accordance with the provisions of section nine as the probable total consumption during the year, it shall be presumed, with regard to such class of articles, that town-duty has been levied on it in cases when it is not actually used or consumed within the limits of the municipality, and a report, explaining the reason of such excess over such estimated quantity, shall forthwith be made by the Committee for the information of the Local Government, and a copy of such report shall forthwith be sent by the Local Government for the information of the Governor General in Council.

Presumption that duty has been levied on articles not consumed in the municipality, when return of quantity on which duty paid exceeds by one-fourth quantity estimated.

Unless the Local Government, on receipt of such report or after such further inquiry as it may think necessary, is satisfied that duty has not been so levied, or that such excess is due to some temporary fluctuation in the ordinary course of trade or some other temporary cause, it shall, by notification in the official Gazette, order that the levy of town-duty on such class of article shall cease.

Local Government to order that the levy of duty on such articles shall cease.

On the publication of an order under this section, no town-duty shall again be levied on such class of articles until after the expiration of two years from the date of such order.

On such order no duty to be levied on such articles for two years.

The Local Government shall forthwith report every such order and the reasons therefor to the Governor General in Council.

Order to be reported to the Governor General in Council.

12. All town-duties shall be collected by officers directly appointed by the Committee.

Town duties to be collected by municipal officers.

13. Subject to the control of the Governor General in Council, the Local Government may, from time to time, make rules consistent with this Act for—

Power to Local Government to make Rules.

(*a*) limiting the articles or classes of articles liable to town-duty ;

(*b*) limiting the amount of town-duty leviable upon any article;

(*c*) prescribing the conditions under which the warehouses referred to in section eight shall be provided and under which articles may be stored therein, and the fees which may be levied for the use of the same ; and

(*d*) prescribing the manner in which the estimate and statement referred to in sections nine and ten respectively shall be prepared.

All such rules shall be published in the local official Gazette, and shall thereupon have the force of law.

14. No toll shall be levied by any Committee unless the same is levied under some enactment for the time being in force and is levied on a road, bridge, quay, wharf or other work solely for the purpose of defraying the cost of the construction of such work, or of its maintenance, or the interest on the capital expended thereon.

Tolls not to be levied except for purpose of defraying cost of construction of work or its maintenance.

If any question arises as to whether any toll is levied solely for the purpose aforesaid, the decision of the Local Government thereon shall be final.

DILUTE SULPHURIC ACID IN THE TREATMENT OF CHOLERA.

INDIA OFFICE,
London, 18th September 1879.

atistics and Commerce.
No. 116.

To His Excellency the Right Honorable the Governor General of India in Council.

MY LORD,—I transmit a copy of two letters* from Dr. Henry MacCormac, advocating the use of dilute sulphuric acid as a prophylactic in case of an outbreak of cholera, and I request that Your Excellency will at once take measures for bringing the specific under the notice of the Medical Officers, Civil and Military, in India.

*Dated 26th and 31st August 1879.

I have the honor to be,
MY LORD,
Your Lordship's most obedient humble Servant,

CRANBROOK.

Dated 26th August 1879.

From—H. MACCORMAC, Esq., M. D., Consg. Physician to the Belfast Royal Hospital.

To—The Secretary of State for India.

In common with every one who has paid any attention to the subject, I learn from the public journals that cholera is making and has made destructive ravages among the troops, Native and European, in Afghanistan and the Punjab. I have had an extensive experience of Asiatic cholera, and in the course of it became acquainted with the efficacy of dilute sulphuric acid in the treatment. It occurred to me that a remedy found so useful might prove further appropriate as a means of prevention. Before a disease breaks out in the living organism there is commonly a period of incubation during which the malady does not shew itself but is preparing to do so. This is the time to strike, and thereby, if possible, to hinder the disease from entering. For surely, it is better to prevent than to wait for the appearance of such a scourge. In a public institution to which I am visiting physician, cholera broke out in 1854. Fifty cases occurred almost simultaneously. Out of these, seventeen presently died. At once I placed the whole establishment, consisting of some 300 or 400 persons, under the daily exhibition of one drachm, a large tea-spoonful or so, of dilute sulphuric acid in a small cup of peppermint water. I had, in fact, a large vesselful prepared, so that it was quite a simple matter to give the acid, diluted as thus, to each one in prompt succession. The point I now wish to arrive at is this,—so soon as the members of the establishment came under the influence of the dilute acid—and that I may say was immediately after its administration—no other case of cholera whatever ensued. The facts are quite inexpugnable, and I conceive, justify an immediate message to India, ordering troops and civilians whenever and wherever the dreadful scourge of Asiatic cholera shews its head to be placed under the instant prophylactic efficacy

of dilute sulphuric acid, given, say, once or even twice daily. Ten parts of water to one of sulphuric acid are found to dilute it sufficiently. Dilute sulphuric acid, as a prophylaxis, is calculated, I believe, to rescue multitudes and avert great suffering. I have adverted to the subject before, and, actuated by a sense of a public duty, would now fain press the matter home afresh.

Dated 31st August 1879.

From—H. MACCORMAC, Esq., M. D., Consg. Physician to the Belfast Royal Hospital.

To—The Secretary of State for India.

I beg to express my extreme satisfaction in respect of your kindness in informing me that you will lay the results of my experience in regard of the prophylactic efficacy of dilute sulphuric acid before the Government of India. I have also to return thanks to the conductors of the medical journals for their goodness in giving publicity to the subject in their columns. In 1832, and since, I have treated between three and four thousand cases of Asiatic cholera. I had not, however, at first ascertained the prophylactic efficacy of dilute sulphuric acid. It is one of the cheapest as well as one of the most powerful of remedies. A pound of sulphuric acid in bulk costs about a penny. This diluted, yields ten pounds of medicinal acid, which, again sub-divided, gives 1,280 drachms or doses, rendering the same number of persons, when administered, approximately safe for one day and night. Asiatic cholera, when prevalent, principally implicates the poor, the heedless, and the destitute; but persons in opulent circumstances are not always exempt. Officers—speaking of military men—are less frequently affected than privates, but officers themselves do not always escape A vast number of valuable lives of all classes have been sacrificed. The primary cause of cholera aside, I do not know any source for its propagation except contagion or infection; and, secondarily, the garments or bed-coverings which the sufferers have made use of, and the dejections which have passed from their persons.

In India, the sanitary arrangements, as here, are exceedingly unsatisfactory. I would recommend the universal adoption of earth-closets. Earth, properly dried and placed in elevated receptacles, will flow almost as freely as water, and can be used precisely in the same fashion.* The universal adoption of the earth-closet system would preserve a multitude of lives, and redound not less to moral than to physical well-being. The sinking of heart, the prostration, and the terror which the sudden invasion of Asiatic cholera is calculated to produce, and from which even the bravest cannot be said to be wholly exempt, are not to be described in words. The introduction of dilute sulphuric acid would prove not only an invaluable preservative from disease, but would constitute a moral support and encouragement of the highest importance.

Trusting that immediate telegraphic messages to every place where Asiatic cholera prevails may be the result of my communication.

* I recommend dried earth, pulverised, a hundred parts, sulphate of lime ten parts, sulphate of alumina five parts, sulphate of iron five parts, sulphuric acid five parts—all well blended together. Of this sanitary humus, as I would term it, thousands and tens of thousands of tons might be prepared in the dry season and laid past for use.
